Corporate Water Management Policy

Introduction

Water is currently regarded as an essential resource in our world. It belongs to everyone and needs to be shared. Establishing the corporate water management policy, Thai Beverage Public Company Limited and its subsidiary companies (“ThaiBev”) focuses on effectiveness of water management and minimizing impact on the environment and society.

Scope of the Policy

The corporate water management policy sets out clear intentions and guidelines as follows:

1. Strive to minimize water impact of ThaiBev’s products, production activities, and services on environment and society by identifying, analyzing, managing, and implementing new technologies.

2. Assess quality, quantity and regulation pertaining to future water availability, and mitigating water-related risk from ThaiBev’s use.

3. Promote the significance of water resource preservation and cultivate sustainable water management value as ThaiBev’s corporate culture.

4. Incorporate water sustainability management into business strategy, decision making, and daily activities.

5. Proactively apply the international water resource management tools and standards and promote the United Nations Sustainable Development Goals (UNSDG) on sanitation, hygiene and well-being.

6. Produce ThaiBev’s products with the maximum efficiency in using and disposing water throughout its production processes.

7. Be responsible for ThaiBev’s water consumption without compromising on quality of final products, and consumer’s health and safety.

ThaiBev is responsible for supporting, adhering to and pushing forward the corporate water management policy harmoniously.
