Terms of engagement

LRQA (Thailand) Limited was commissioned by Thai Beverage Public Company Limited (ThaiBev), to provide independent assurance on its Sustainability Report ("the report") against the assurance criteria below to a limited level of assurance and at the materiality of the professional judgement of the verifier using LRQA's verification procedure. LRQA's verification procedure is based on ISAE 3000(revised)¹ and uses the following principles of inclusivity, materiality, impact, responsiveness and reliability of performance data.

Our assurance engagement covered ThaiBev's operations and activities in France, Malaysia, Myanmar, New Zealand, Singapore, Thailand, United Kingdom and Vietnam specifically the following requirements:

- Confirming that the report is in accordance with GRI Standards 2021 included double materiality assessment.
- Reviewing the integrity of ThaiBev' supplier assessment process and GRI 2-26 Mechanism for seeking advice and raising concerns.
- Evaluating the reliability of data and information for only the selected environmental and social indicators listed below:

Our assurance engagement excluded the data and information of ThaiBev's suppliers, contractors and any third-parties mentioned in the report.

LRQA's responsibility is only to ThaiBev. LRQA disclaims any liability or responsibility to others as explained in the end footnote. ThaiBev's responsibility is for collecting, aggregating, analysing and presenting all the data and information within the report and for maintaining effective internal controls over the systems from which the report is derived. Ultimately, the report has been approved by, and remains the responsibility of ThaiBev.

LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that ThaiBev has not, in all material respects:

- Met the requirements above
- Disclosed reliable performance data and information as no errors or omissions were detected
- Covered all the issues that are important to the stakeholders and readers of this Report.

The opinion expressed is formed on the basis of a limited level of assurance and at the materiality of the professional judgement of the verifier.

Note: The extent of evidence-gathering for a limited assurance engagement is less than for a reasonable assurance engagement. Limited assurance engagements focus on aggregated data rather than physically checking source data at sites. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

LRQA's approach

LRQA's assurance engagements are carried out in accordance with our verification procedure. The following tasks though were undertaken as part of the evidence gathering process for this assurance engagement:

- Assessing ThaiBev's approach to stakeholder engagement to confirm that issues raised by stakeholders were captured correctly. We did this by interviewing ThaiBev's Management who engage directly with stakeholder groups, identify and endorses materiality lists as well as reviewing documents and associated records.
- Collaboration of the third-party report for ThaiBev's IT security Vulnerability Assessment in June 2025

¹ GHG quantification is subject to inherent uncertainty.

- Auditing ThaiBev’s data management systems to confirm that there were no significant errors, omissions or mis-statements in the data. We did this by reviewing the effectiveness of data handling procedures, instructions and systems, including those for internal verification. We also spoke with those key people responsible for compiling the data and drafting the report.
 - Confirming the reliability of the selected specific standards’ data by sampling evidence at:
 - Spirits Group:

 - Thanapakdi Company Limited, Chiangmai, Thailand

Observations

Further observations and findings, made during the assurance engagement, are:

- Stakeholder Inclusivity
We are not aware of any key stakeholder group that have been excluded from ThaiBev’ engagement process.
- Materiality
We are not aware of any material aspects concerning ThaiBev’s sustainability performance that have been excluded from the report.
- Responsiveness
ThaiBev has processes for responding to various stakeholder groups. We believe that future report should include progress in supplier improvement being taken by ThaiBev.
- Impact
ThaiBev has identified any negative ESG impacts through supply chain which provide meaningful information for mitigation action.
- Reliability
Data management systems are established and centralized for the data and information collection and calculation associated with the selected GRI indicators. However, we believe that the periodic internal verification will help improving the quality and reliability of data reported in the future, typically for tracking performances overtimes.

LRQA’s standards, competence and independence

LRQA ensures the selection of appropriately qualified individuals based on their qualifications, training and experience. The outcome of all verification and certification assessments is then internally reviewed by senior management to ensure that the approach applied is rigorous and transparent.

This verification and management system audit are the only works undertaken by LRQA for ThaiBev and as such does not compromise our independence or impartiality.
